

Offshore Gas Development Ichthys LNG Project

Outline

The Ichthys LNG Project will, **during the current fiscal year** (ending March 31, 2018), begin production.

Production volume (planned)

- LNG: Approx. 8.9 million tons/year
- LPG: Approx. 1.65 million tons/year
- Condensate: Approx. 100,000 barrels per day (at peak)

What can be achieved

- Large-scale LNG project: operation **over a period of 40 years**
- Project's two gigantic floating facilities
 1. CPF: 130 m by 120 m, **the world's largest semi-submersible platform**
 2. FPSO: 336 m long and 59 m wide
- Longest subsea gas pipeline: 42" O.D. and **890 km in length**
